Professional Summary

Full-stack developer with hands-on experience building modern, modular web applications using React, Tailwind, REST APIs, and state management tools. Strong foundation in security principles (Security+, ISC2 CC) and systems-level thinking from Linux, networking, and automation work. Known for clear communication, reliability, and being the teammate people trust to solve problems.

Projects

Modular Personal Dashboard

- Built a modular dashboard with widgets for weather, crypto, news, NASA imagery, and time.
- Integrated multiple external APIs with Axios and custom hooks for clean data flow.
- Implemented global state management using Zustand for predictable, scalable behavior.
- Designed a clean, responsive UI with Tailwind and component-based architecture.

Raspberry Pi NAS Setup

- Built a self-hosted NAS using a Raspberry Pi, implementing SMB file sharing, user permissions, configured VPN access, and secure SSH access.
- Designed a reliable, low-cost storage solution that replaces paid cloud services and integrates seamlessly into a home network.

Portfolio Website

- Designed, developed, and deployed a fully responsive web page using HTML, CSS, and JavaScript
- Built custom interactive components, including a modal contact system, message section, and accordion timeline
- Tracked progression using Git version with future improvements planned for ongoing development

Skills

- **Systems:** Linux (Raspbian/Ubuntu), Bash, SMB/CIFS, WireGuard VPN, Azure, SSH
- **Web Developmen**t: HTML5, React, JavaScript (ES6+), Tailwind CSS, REST APIs, Zustand, Axios
- **Programming Languages:** C#, JavaScript, Python
- **Tools:** Git, GitHub, VS Code, Postman

Professional Experience

Package Handler | *FedEx* | 07/2025 - 06/2025

- Earned Employee of the Month twice, recognized for accuracy, teamwork, and consistent productivity within my first six months.
- Consistently exceeded performance expectations in a fast-paced, high-volume logistics environment.

Inventory Manager/Install Specialist **|** *Central States Beverage* **|** 04/2022 – 04/2025

- Managed inventory using Microsoft Excel, enhancing tracking and reporting accuracy.
- Presented data-driven insights at monthly staff meetings of 70+ people, using visualization tools.
- Redesigned operational processes to streamline daily tasks and reduce errors.

Service Agent **|** *Enterprise* **|** 02/2017 - 01/2021

- Provided hands-on support for IoT-enabled vehicle systems, helping customers and teammates troubleshoot issues in a clear, approachable way.

Certifications

CompTIA Security+ **|** Microsoft Certified: Azure Fundamentals (AZ-900) **|** ISC2 Certified in Cybersecurity (CC)
