Professional Summary

Full-stack developer with hands-on experience building modern, modular web applications using React, Tailwind, REST APIs, and state management tools. Strong foundation in security principles (Security+, ISC2 CC) and systems-level thinking from Linux, networking, and automation work.

Internship

Front-End Developer Intern | 4WeekQtr | Aug 2026 – Dec 2026

- **GitHub Workflow** — Created feature branches and managed recurring PRs
- **Reusable Hooks** — Refactored and updated data-fetching hooks into reusable, modular patterns that improved code clarity and reduced duplication across the codebase.
- **TanStack Query** — Implemented TanStack Query for caching, background updates, and consistent API state management, replacing legacy fetch logic.
- **API Integration** — Integrated new API endpoints, improved error handling, and standardized loading states across the app.

Projects

Modular Personal Dashboard

- Built a modular dashboard with widgets for weather, crypto, news, NASA imagery, and time.
- Integrated multiple external APIs with Axios and custom hooks for clean data flow.
- Implemented global state management using Zustand for predictable, scalable behavior.

Raspberry Pi NAS Setup

- Built a self-hosted NAS using a Raspberry Pi, implementing SMB file sharing, user permissions, configured VPN access, and secure SSH access.
- Designed a reliable, low-cost storage solution that replaces paid cloud services and integrates seamlessly into a home network.

Skills

- **Systems:** Linux (Raspbian/Ubuntu), Bash, SMB/CIFS, WireGuard VPN, Azure, SSH
- **Web Developmen**t: HTML5, React, JavaScript (ES6+), Tailwind CSS, REST APIs, Zustand, Axios
- **Programming Languages:** C#, JavaScript, Python

Professional Experience

Package Handler | *FedEx* | 07/2025 - 06/2025

- Earned Employee of the Month twice for accuracy, teamwork, and high-volume productivity

Inventory Manager/Install Specialist **|** *Central States Beverage* **|** 04/2022 – 04/2025

- Managed inventory using Excel and presented data insights to staff meetings of 70+ people
- Improved operational processes to reduce daily errors and streamline workflows

Service Agent **|** *Enterprise* **|** 02/2017 - 01/2021

- Supported IoT-enabled vehicle systems and helped customers troubleshoot technical issues clearly and effectively

Certifications

CompTIA Security+ **|** Microsoft Certified: Azure Fundamentals (AZ-900) **|** ISC2 Certified in Cybersecurity (CC)
